RFID system ID 15

Addressing device DPS/AS-i and AS-i accessories

00123942

Addressing device AS-i

Application:

The sturdy and handy addressing and diagnosis tool for initial operation, maintenance and service of AS-i systems provides the following:

Functions:

– Reads out slave addresses 0 to 31, A, B without scrolling with a clear and complete LCD display
– Reads out slave IO and ID codes (including extended ID codes 1 and 2)

– Standard addressing mode, and extended addressing mode from AS-i version 2.1.
– Programming of ID code1
– Slave function test, also for analog slaves with profile 7.1 to 7.4
– Recognition of all system components
– Memory, diagnosis and PC gateway functions
– Data transmission, data management and documentation of system parameters with optional software
– Connection via M12 plug (A-coded)
– Infrared interface

Scope of delivery: AS-i- addressing and testing appliance DPS/AS-i with batteries (4 x 1.5 V Mignon (AA) LR6).
